IRON AND STEEL ENGINEER INDEX FOR 1936

Herewith is presented the index of all authors, papers, and discussions published in the IRON AND STEEL ENGINEER for the year 1936.

LIST OF AUTHORS

A

ANDERSON, WALTER AND MALCOMB CLARK—*Resistance Welding in Steel Mills*, November 1936, 20.

ANGEL, H. H. AND C. B. HUSTON—*Mill Motors and Motor Rooms, Their Ventilation in Steel Mills*, May 1936, 13.

ARCHER, THOMAS P., AND R. A. GEUDER,—*Steel Sheets for Today's Motor Car, Mechanical and Electrical Problems of Fabrication*, December 1936, 28.

B

BATES, J. W.—*Analysis of Electric Power Costs Comparing Generating and Purchasing Methods*, July 1936, 10.

BATT, W. L.—*The Engineer in the Steel Industry*, August 1936, 14.

BOYNTON, A. J.—*Steel Melting Furnaces, Automatic Control in the Open Hearth*, January, 1936, 25.

BRACE, P. H. AND F. T. HAGUE—*Annealing and Normalizing Auto Body Steel in Electric Furnaces*, September 1936, 47.

BRADLEY, M. J.—*Roof Temperature Control for Use in Open Hearth Furnaces*, February 1936, 24.

BUCKWALTER, T. V. AND O. J. HORGER—*Stress Analysis of Locomotive and other Large Axles*, November 1936, 23.

BURNS,R. S. AND ANSON HAYES—*The Cold Rolling of Mild Steel Sheets and Strip*, December 1936, 36.

BURR, W. H.—*Steel Mill Developments, Report of A. I. & S. E. Committee*, September 1936, 36.

C

CALLINAN, E. E.—*Pouring Pit Refractories, Their Effect on Alloy Steel Quality*, August 1936, 15.

CANDEE, A. H.—*The Diesel Locomotive, Its Use in the Steel Plant*, March 1936, 30.

CLARK, MALCOMB AND WALTER ANDERSON—*Resistance Welding in Steel Mills*, November 1936, 20.

CONWAY, M. J.—*Keep Moving*, January 1936, 27—*Fuel Economy*, September 1936, 20.

D

DANFORTH, GEO. L., JR.—*Use of the Venturi Port, Its Design, Construction and Operation*, February 1936, 19.

DUNMIRE, R. P.—*Maintenance of Lubricating Oils, Modern Methods and Treating Systems*, July 1936, 29.

E

EGGER, E. J. W.—*The Oxy-Acetylene Process, Its Use in the Iron and Steel Industry*, March 1936, 27.

ESAU, G. WALTER—*Inhibitors and Their Probable Mechanism*, November 1936, 33.

G

GEUDER, R. A., AND THOMAS P. ARCHER—*Steel Sheets for Today's Motor Car, Mechanical and Electrical Problems of Fabrication*, December 1936, 28.

H

HAGUE, F. T. AND P. H. BRACE—*Annealing and Normalizing Auto Body Steel In Electric Furnaces*, September 1936, 47.

HAND, CHARLES R.—*Designing for Lubrication, Its Importance in Mill Equipment*, March 1936, 13.

HARRELL, F. E.—*Problems of Motor Application for Continuous Mill Auxiliaries*, April 1936, 63.

HAYES, ANSON AND R. S. BURNS—*The Cold Rolling of Mild Steel Sheets and Strip*, December 1936, 39.

HILL, E. G. AND J. D. WALTERS—*The Pouring of Molten Steel, Efforts Made to Produce Sound Ingots*, February 1936, 14.

HOLVECK, J. E.—*Descaling Hot Steel Hydraulically, the Application of Water at High Velocity*, May 1936, 1.

HORGER, O. J. AND T. V. BUCKWALTER—*Stress Analysis of Locomotive and Other Large Axles*, November 1936, 23.

HUSTON, C. B. AND H. H. ANGEL—*Mill Motors and Motor Rooms, Their Ventilation in Steel Mills*, May 1936, 13.

I

IRVIN, WM. A.—*Steel Greets Oil*, May 1936, 25.

K

KLEIN, C. J.—*Lubrication of Steel Mill Equipment*, November 1936, 13.

M

MAAG, O. L.—*Lubricant Specifications, Their Development for the Steel Industry*, January 1936, 13.

MAWHINNEY, M. H.—*Circular Heating Furnaces, Their Development for Ingot Heating*, June 1936, 26.

MELLON, J. J.—*Electric Control Systems for Continuous Strip Pickle Lines*, July 1936, 1.

MOHLER, F.—*Tension Control in Cold Strip Rolling*, October 1936, 19.

O

OTIS, A. N.—*Annealing Sheet and Strip Steel with the Use of Electric Furnaces*, February 1936, 1.

R

REDDIE, W. W. AND E. STEINERT, ARC WELDING APPARATUS, THE DEVELOPMENTS IN ARC WELDING, January 1936, 9.

ROSE, G. E. AND E. H. SCHWARTZ—*Open Hearth Furnace Operation Four Million B.T.U. per Ton*, January 1936, 1.

S

SCHNURE, F. O.—*Stock Rooms for Maintenance, Their Importance in the Steel Industry*, May 1936, 29.

SCHWARTZ, E. H. AND G. E. ROSE—*Open Hearth Furnace Operation Four Million B.T.U. per Ton*, January 1936, 1.

SOLER, GILBERT—*Open Hearth Furnaces, Factors to be Considered in Insulation*, February 1936, 11.

STEINERT, E. AND W. W. REDDIE—*Arc Welding Apparatus, The Developments in Arc Welding*, January 1936, 9.

STONE, M.—*Recent Innovations in Rolling Mills at Ford Motor Company*, October 1936, 15.

The Control and Recording of Rolling Mill Pressures, June 1936, 21.

STURROCK, WALTER—*Steel Mill Lighting, Recent Developments and Improvements*, August 1936, 1.

T

TUCK, D. H.—*Steel Mill Lighting Developments made during 1935*, January 1936, 23.

U

UMANSKY, L. A.—*Applying Synchronous Motors to Main Roll Mill Drives*, June 1936, 1.

W

WALTERS, J. D. AND E. G. HILL—*The Pouring of Molten Steel, Efforts made to Produce Sound Ingots*, February 1936, 14.

WINLOCK, JOSEPH—*Strip Steel for Deep Drawing Purposes*, December 1936,

WOOFTER, H. A.—*Commercial Welding as Applied to Steel Mills*, November 1936, 31.

LIST OF SUBJECTS

A

Alloy Steel Quality—Pouring Pit Refractories, Their Effect on—By E. E. CALLINAN, August 1936, 15.

Analysis of Electric Power Costs Comparing Generating and Purchasing Methods—By J. W. BATES, July 1936, 10.

Analysis of Locomotive and Other Large Axles—Stress—By T. V. BUCKWALTER AND O. J. HORGER, November 1936, 23.

Annealing and Normalizing Auto Body Steel in Electric Furnaces—By F. T. HAGUE AND P. H. BRACE, September 1936, 47.

Annealing Sheet and Strip Steel with the use of Electric Furnaces—By A. N. OTIS, February 1936, 1.

Apparatus, The Developments in Arc Welding—Arc Welding—By E. STEINERT AND W. W. REDDIE, January 1936, 9.

Application of Water at High Velocity—Descaling Hot Steel Hydraulically, The—By J. E. HOLVECK, May 1936, 1.

Applications for Continuous Mill Auxiliaries—Problems of Motor—By F. E. HARRELL, April 1936, 53.

Applied to Main Roll Drives, During 1935—Electric Motors over 300 Horsepower—January 1936, 36.

Applied to Steel Mills—Commercial Welding as—By H. A. WOOFTER, November 1936, 31.

Applying Synchronous Motors to Main Roll Mill Drives—By L. A. UMANSKY, June 1936, 1.

Arc Welding Apparatus, The Developments in Arc Welding—By E. STEINERT AND W. W. REDDIE, January 1936, 9.

A. I. & S. E. Committee, Steel Mill Developments, Report of—By W. H. BURR, September 1936, 36.

Auto Body Steel in Electric Furnaces—Annealing and Normalizing—By F. T. HAGUE AND P. H. BRACE, September 1936, 47.

Automatic Control in the Open Hearth—Steel Melting Furnaces—By A. J. BOYNTON, January 1936, 25.

Auxiliaries—Problems of Motor Application for Continuous Mill—By F. E. HARRELL, April 1936, 53.

Axles—Stress Analysis of Locomotive and Other Large—By T. V. BUCKWALTER AND O. J. HORGER, November 1936, 23.

B

Body Steel in Electric Furnaces—Annealing and Normalizing Auto—By F. T. HAGUE AND P. H. BRACE, September 1936, 47.

B.T.U. per Ton—Open Hearth Furnace Operation, Four Million—By E. H. SCHWARTZ AND G. E. ROSE, January 1936, 1.

C

Car, Mechanical and Electrical Problems of Fabrication—Steel Sheets for Today's Motor—By THOMAS P. ARCHER AND R. A. GEUDER, December 1936, 28.

Characteristics—Steel Plant Power—December 1936.

Circular Heating Furnaces, Their Development for Ingot Heating—By M. H. MAWHINNEY, June 1936, 26.

Coking Process—The Determination of Yields in the—November 1936, 27.

Cold Rolling of Mild Steel Sheets and Strip, The—By ANSON HAYES AND R. S. BURNS, December 1936, 39.

Cold Strip Rolling—Tension Control in—By F. MOHLER, October 1936, 19.

Commercial Welding as Applied to Steel Mills—By H. A. WOOFTER, November 1936, 31.

Committee—Steel Mill Developments, Report of A. I. & S. E.—By W. H. BURR, September 1936, 36.

Company—Recent Innovations in Rolling Mills at Ford Motor—By M. STONE, October 1936, 15.

Comparing Generating and Purchasing Methods—Analysis of Electric Power Costs—By J. W. BATES, July 1936, 10.

Construction and Operation—Use of the Venturi Port, Its Design——By GEO. L. DANFORTH, February 1936, 19.

Continuous Mill Auxiliaries—Problems of Motor Application for—By F. E. HARRELL, April 1936, 53.

Continuous Strip Pickle Lines—Electric Control Systems for—By J. J. MELLON, July 1936, 1.

Control and Recording of Rolling Mill Pressures, The—By M. STONE, June 1936, 21.

Control for Use in Open Hearth Furnaces—Roof Temperature—By M. J. BRADLEY, February 1936, 24.

Control in Cold Strip Rolling—Tension—By F. MOHLER, October, 1936, 19.

Control in the Open Hearth—Steel Melting Furnaces, Automatic—By A. J. BOYTON, January 1936, 25.

Control Systems for Continuous Strip Pickle Lines—Electric—By J. J. MELLON, July 1936, 1.

Costs Comparing Generating and Purchasing Methods—Analysis of Electric Power—By J. W. BATES, July 1936, 10.

Crane Statistics, 1935—Electrically Operated—January 1936, 38.

D

Deep Drawing Purposes—Sheet and Strip Steel for—By JOSEPH WINLOCK, December 1936, 11.

Descaling Hot Steel Hydraulically, The Application of Water at High Velocity—By J. E. HOLVECK, May 1936, 1.

Design, Construction and Operation—Use of the Venturi Port, Its—By GEO. L. DANFORTH, February 1936, 19.

Designing for Lubrication, Its Importance in Mill Equipment—By CHAS. R. HAND, March 1936, 13.

Determination of Yields in the Coking Process, The—November 1936, 27.

Development for Ingot Heating—Circular Heating Furnaces, Their—By M. H. MAWHINNEY, June 1936, 26.

Development for the Steel Industry—Lubricant Specifications, Their—By O. L. Maag, January 1936, 13.

Developments and Improvements—Steel Mill Lighting, Recent—By Walter Sturrock, August 1936, 1.

Developments in Arc Welding—Arc Welding Apparatus, The—By E. Steinert and W. W. Reddie, January 1936, 9.

Developments Made During 1935—Steel Mill Lighting—By D. H. Tuck, January 1936, 23.

Developments, Report of A. I. & S. E. Committee—Steel Mill—By W. H. Burr, September 1936, 36.

Diesel Locomotive, Its Use in the Steel Plant, The—By A. H. Candee, March 1936, 30.

Discussion: Analysis of Electric Power Costs Comparing Generating and Purchasing Methods,—By Gordon Fox, G. W. Ohsler, H. A. P. Langstaff, B. M. Jones and A. H. Dyckerhoff, July 1936, 20.

Discussion: Annealing Sheet and Strip Steel With the Use of Electric Furnaces—By M. J. Conway, H. V. Flagg, and A. N. Otis, February 1936, 10.

Discussion: Circular Heating Furnaces, Their Development for Ingot Heating—By M. H. Mawhinney, M. J. Conway, P. M. Offill, F. E. Leahy, A. G. Witting, and J. L. Miller, June 1936, 28.

Discussion: Descaling Hot Steel Hydraulically, The Application of Water at High Velocity—By H. B. Mann, J. E. Holveck, M. Stone, J. H. Vohr, Howard Linn and C. L. McGranahan, May 1936, 10.

Discussion: Designing for Lubrication, Its Importance in Mill Equipment—By L. F. Coffin, S. J. Shavinsky, F. O. Schnure, M. Reswick, G. C. Pfeffer, W. G. McDonald, W. S. Wagner, D. L. Sasser, E. S. Glauch, F. W. Vogt, H. S. Page, F. J. Thomas, L. M. Nesselbuss, P. G. Lessmann, J. A. Burg, M. Reswick, J. H. Schenck, C. R. Hand, H. K. Siefers, L. R. Foust, March 1936, 19.

Discussion: Diesel Locomotive, Its Use in the Steel Plant—By H. B. Ayers, W. C. Van Blarcom, J. W. Hoover, F. E. Wynne, R. M. Mullen, S. B. Schenck, K. B. Dickson, H. P. Bender, J. R. Sloan, Walter Greenwood. D. M. Petty, A. H. Candee, G. E. Stoltz, B. H. Kersting, March 1936, 37.

Discussion: Lubrication of Steel Mill Equipment—By F. J. Thomas, F. L. Gray, A. F. Brewer, H. R. Gilchrist, and S. A. Newman, November 1936, 19.

Discussion: Mill Motors and Motor Rooms, Their Ventilation in Steel Mills—By F. O. Schnure, J. H. Hucker, J. C. Reed and W. G. McDonald, May 1936, 23.

Discussion: Open Hearth Furnace Operation, Four Million B.T.U. Per Ton—By A. Carter, H. G. Erb, F. M. Washburn, K. C. McCutcheon, M. J. Conway and G. E. Rose, January 1936, 7.

Discussion: Roof Temperature Control for Use in Open Hearth Furnaces—By J. A. Carter, K. C. McCutcheon, L. A. Deesz, M. J. Bradley, E. W. Hill, M. J. Conway and Gilbert Soler, February 1936, 28.

Discussion: Sheet and Strip Steel for Deep Drawing Purposes—By K. L. Kerschbaum, J. H. Vohr, W. C. Tamplin, H. P. Munger, J. S. Stanier and J. Winlock, December 1936, 19.

Discussion: Steel Mill Lighting, Recent Developments and Improvements—By H. W. Dallas, H. R. Pancoast, A. J. Standing, R. W. Corwin, R. M. Fuller, G. C. Pfeffer, E. Anderson, C. H. Grim, N. C. Bye, A. T. Lukens, G. O. Van Artsdalen, E. L. Sholl, R. B. Gray, G. J. Amelinck, and F. O. Schnure, August 1936, 8.

Discussion: The Pouring of Molten Steel, Efforts Made to Produce Sound Ingots—By J. A. Carter, K. C. McCutcheon, and E. G. Hill, February 1936, 18.

Discussion: Use of the Venturi Port, Its Design, Construction and Operation—By J. A. Carter, G. E. Rose and W. C. Kitto, February 1936, 23.

Drawing Purposes—Sheet and Strip Steel for Deep—By Joseph Winlock, December 1936, 11.

Drives—Applying Synchronous Motors to Main Roll Mill Drives—By L. A. Umansky, June 1936, 1.

Drives During 1935—Electric Motors over 300 Horsepower Applied to Main Roll—January 1936, 36.

During 1935—Electric Motors over 300 Horsepower Applied to Main Roll Drives—January 1936, 36.

During 1935, Rehabilitation and Modernization in the Iron and Steel Industry, January 1936, 28.

During 1935—Steel Mill Lighting Developments Made—By D. H. Tuck, January 1936, 23.

E

Economy—Fuel—By M. J. Conway, September 1936, 20.

Effect on Alloy Steel Quality—Pouring Pit Refractories, Their—By E. E. Callinan, August 1936, 15.

Efforts Made to Produce Sound Ingots—The Pouring of Molten Steel—By J. D. Walters and E. G. Hill, February 1936, 14.

Electric Control Systems for Continuous Strip Pickle Lines—By J. J. Mellon, July 1936, 1.

Electric Furnaces—Annealing and Normalizing Auto Body Steel in—By F. T. Hague and P. H. Brace, September 1936, 47.

Electric Furnaces—Annealing Sheet and Strip Steel With the Use of—By A. N. Otis, February 1936, 1.

Electric Motors Over 300 Horsepower Applied to Main Roll Drives During 1935, January 1936, 36.

Electric Power Costs Comparing Generating and Purchasing Methods—Analysis of—By J. W. Bates, July 1936, 10.

Electrical Problems of Fabrication—Steel Sheets for Today's Motor Car, Mechanical and—By Thomas P. Archer and R. A. Geuder, December 1936, 28.

Electrically Operated Crane Statistics, 1935—January 1936, 38.

Engineer in the Steel Industry, The—By W. L. Batt, August 1936, 14.

Equipment—Designing for Lubrication, Its Importance in Mill—By Chas. R. Hand, March 1936, 13.

Equipment—Lubrication of Steel Mill—By C. J. Klein, November 1936, 13.

F

Factors to be Considered in Insulation—Open Hearth Furnaces—By Gilbert Soler, February 1936, 11.

Four Million B.T.U. per Ton—Open Hearth Furnace Operation—By G. E. Rose and E. H. Schwartz, January 1936, 1.

Fuel Economy—By M. J. Conway, September 1936, 20.

Furnace Operation, Four Million B.T.U. per Ton—Open Hearth—By E. H. Schwartz and G. E. Rose, January 1936, 1.

Furnaces—Annealing and Normalizing Auto Body Steel in Electric—By F. T. Hague and P. H. Brace, September 1936, 47.

Furnaces—Annealing Sheet and Strip Steel With the Use of Electric—By A. N. Otis, February 1936, 1.

Furnaces Automatic Control in the Open Hearth—Steel Melting—By A. J. Boynton, January 1936, 25.

Furnaces, Factors to be Considered in Insulation—Open Hearth—By Gilbert Soler, February 1936, 11.

Furnaces—Roof Temperature Control for Use in Open Hearth—By M. J. Bradley, February 1936, 24.

Furnaces—Their Development for Ingot Heating—Circular Heating—By M. H. Mawhinney, June 1936, 26.

G

Generating and Purchasing Methods—Analysis of Electric Power Costs Comparing—By J. W. Bates, July 1936, 10.

Greets Oil—Steel—By Wm. A. Irvin, May 1936, 25.

H

Heating—Circular Heating Furnaces, Their Development for Ingot—By M. H. Mawhinney, June 1936, 26.

Heating Furnaces, Their Development for Ingot Heating—Circular—By M. H. MAWHINNEY, June 1936, 26.

High Velocity—Descaling Hot Steel Hydraulically, the Application of Water at—By J. E. HILVECK, May 1936, 1.

Hot Steel Hydraulically, The Application of Water at High Velocity—Descaling—By J. E. HOLVECK, May 1936, 1.

Hydraulically, The Application of Water at High Velocity—Descaling Hot Steel—By J. E. HOLVECK, May 1936, 1.

I

Importance in Mill Equipment—Designing for Lubrication, Its—By CHAS. R. HAND, March 1936, 13.

Importance in the Steel Industry—Stock Rooms for Maintenance, Their—By F. O. SCHUREN, May 1936, 29.

Improvements—Steel Mill Lighting, Recent Developments and—By WALTER STURROCK, August 1936, 1.

Industry During 1935—Rehabilitation and Modernization in the Iron and Steel—January 1936, 28.

Industry—Lubricant Specifications, Their Development for the Steel—By O. L. MAAG, January 1936, 13.

Industry—Stock Rooms for Maintenance, Their Importance in the Steel—By F. O. SCHNURE, May 1936, 29.

Industry—The Engineer in the Steel Industry—By W. L. BATT, August 1936, 14.

Industry—The Oxy-Acetylene Process, Its Use in the Iron and Steel—By E. J. W. EGGER, March 1936, 27.

Ingot Heating—Circular Heating Furnaces, Their Development for—By M. H. MAWHINNEY, June 1936, 26.

Ingots—The Pouring of Molten Steel, Efforts Made to Produce Sound—By J. D. WALTERS AND E. G. HILL, February 1936, 14.

Inhibitors and Their Probable Mechanism—By G. WALTER ESAU, November 1936, 33.

Innovations in Rolling Mills at Ford Motor Company—Recent—By M. STONE, October 1936, 15.

Insulation—Open Hearth Furnaces, Factors to be Considered in—By GILBERT SOLER, February 1936, 11.

Iron and Steel Industry During 1935—Rehabilitation and Modernization in the—January 1936, 28.

Iron and Steel Industry, The Oxy-Acetylene Process, Its Use in the—By E. J. W. EGGER, March 1936, 27.

K

Keep Moving—By M. J. CONWAY, January 1936, 27.

L

Large Axles—Stress Analysis of Locomotive and Other—By T. V. BUCKWALTER AND O. J. HORGER, November 1936, 23.

Lighting Developments Made During 1935—Steel Mill—By D. H. TUCK, January 1936, 23.

Lighting, Recent Developments and Improvements—Steel Mill—By WALTER STURROCK, August 1936, 1.

Lines—Electric Control Systems for Continuous Strip Pickle—By J. J. MELLON, July 1936, 1.

Locomotive and Other Large Axles—Stress Analysis of—By T. V. BUCKWALTER AND O. J. HORGER, November 1936, 23.

Locomotive, Its Use in the Steel Plant—The Diesel—By A. H. CANDEE, March 1936, 30.

Lubricant Specifications, Their Development for the Steel Industry—By O. L. MAAG, January 1936, 13.

Lubricating Oils, Modern Methods and Treating Systems—Maintenance of—By R. P. DUNMIRE, July 1936, 29.

Lubrication, Its Importance in Mill Equipment—Designing for—By CHAS. R. HAND, March 1936, 13.

Lubrication of Steel Mill Equipment—By C. J. KLEIN, November 1936, 13.

M

Main Roll Drives During 1935—Electric Motors over 300 Horsepower Applied to—January 1936, 36.

Main Roll Mill Drives—Applying Synchronous Motors to—By L. A. UMANSKY, June 1936, 1.

Maintenance of Lubricating Oils, Modern Methods and Treating Systems—By R. P. DUNMIRE, July 1936, 29.

Maintenance, Their Importance in the Steel Industry—Stock Rooms for—By F. O. SCHNURE, May 1936, 29.

Mechanical and Electrical Problems of Fabrication—Steel Sheets for Today's Motor Car—By THOMAS P. ARCHER AND R. A. GEUDER, December 1936, 28.

Mechanism—Inhibitors and Their Probable—By G. WALTER ESAU, November 1936, 33.

Melting Furnaces Automatic Control in the Open Hearth—Steel—By A. J. BOYNTON, January 1936, 25.

Methods—Analysis of Electric Power Costs Comparting Generating and Purchasing—By J. W. BATES, July 1936, 10.

Methods and Treating Systems—Maintenance of Lubricating Oils, Modern—By R. P. DUNMIRE, July 1936, 29.

Mild Steel Sheets and Strip—The Cold Rolling of—By ANSON HAYES AND R. S. BURNS, December 1936, 39.

Mill Auxiliaries—Problems of Motor Application for Continuous—By F. E. HARRELL, April 1936, 53.

Mill Developments, Report of A. I. & S. E. Committee—Steel—By W. H. BURR, September 1936, 36.

Mill Drives—Applying Synchronous Motors to Main Roll—By L. A. UMANSKY, June 1936, 1.

Mill Equipment—Designing for Lubrication, Its Importance in—By CHAS. R. HAND, March 1936, 13.

Mill Equipment—Lubrication of Steel—By C. J. KLEIN, November 1936, 13.

Mill Lighting, Developments Made During 1935—Steel—By D. H. TUCK, January 1936, 23.

Mill Lighting, Recent Developments and Improvements—Steel—By WALTER STURROCK, August 1936, 1.

Mill Motors and Motor Rooms, Their Ventilation in Steel Mills—By H. H. ANGEL AND C. B. HUSTON, May 1936, 13.

Mill Pressures—The Control and Recording of Rolling—By M. STONE, June 1936, 21.

Mills at Ford Motor Company—Recent Innovations in Rolling—By M. STONE, October 1936, 15.

Mills—Commercial Welding as Applied to Steel—By H. A. WOOFTER, November 1936, 31.

Mills—Mill Motors and Motor Rooms, Their Ventilation in Steel—By H. H. ANGEL, AND C. B. HUSTON, May 1936, 13.

Mills—Resistance Welding in Steel—By WALTER ANDERSON AND MALCOMB CLARK, November 1936, 20.

Modern Methods and Treating Systems—Maintenence of Lubricating Oils—By R. P. DUNMIRE, July 1936, 29.

Modernization in the Iron and Steel Industry during 1935—Rehabilitation and—January 1936, 28.

Molten Steel, Efforts Made to Produce Sound Ingots—The Pouring of—By J. D. WALTERS AND E. G. HILL, February 1936, 14.

Motor Applications for Continuous Mill Auxiliaries—Problems of—By F. E. HARRELL, April 1936, 53.

Motor Car, Mechanical and Electrical Problems of Fabrication—Steel Sheets for Today's—By THOMAS P. ARCHER AND R. A. GEUDER, December 1936, 28.

Motor Company—Recent Innovations in Rolling Mills at Ford—By M. STONE, October 1936, 15.

Motor Rooms, Their Ventilation in Steel Mills—Mill Motors and—By H. H. ANGEL, AND C. B. HUSTON, May 1936, 13.

Motors and Motor Rooms, Their Ventilation in Steel Mills—Mill—By H. H. Angel and C. B. Huston, May 1936, 13.

Motors Over 300 Horsepower Applied to Main Roll Drives During 1935—Electric—January 1936, 36.

Motors to Main Roll Mill Drives, Applying Synchronous—By L. A. Umansky, June 1936, 1.

Moving—Keep—By M. J. Conway, January 1936, 27.

N

Normalizing Auto Body Steel in Electric Furnaces—Annealing and—By F. T. Hague and P. H. Brace, September 1936, 47.

O

Oil—Steel Greets—By Wm. A. Irvin, May 1936, 25.

Oils, Modern Methods and Treating Systems—Maintenance of Lubricating—By R. P. Dunmire, July 1936, 29.

Open Hearth Furnace Operation, Four Million B.T.U. per Ton—By E. H. Schwartz and G. E. Rose, January 1936, 1.

Open Hearth Furnaces, Factors to be Considered in Insulation—By Gilbert Soler, February 1936, 11.

Open Hearth Furnaces—Roof Temperature Control for Use in—By M. J. Bradley, February 1936, 24.

Open Hearth—Steel Melting Furnaces, Automatic Control in the—By A. J. Boynton, January 1936, 25.

Operated Crane Statistics—1935—Electrically—January 1936, 38.

Operation, Four Million B.T.U. Per Ton—Open Hearth Furnace—By E. H. Schwartz and G. E. Rose, January 1936, 1.

Operation—Use of the Venturi Port, Its Design, Construction and—By Geo. L. Danforth, February 1936, 19.

Other Large Axles—Stress Analysis of Locomotive and—By T. V. Buckwalter and O. J. Horger, November 1936, 23.

Oxy-Acetylene Process, Its Use in the Iron and Steel Industry—The—By E. J. W. Egger, March 1936, 27.

P

Pickle Lines—Electric Control Systems for Continuous Strip—By J. J. Mellon, July 1936, 1.

Pit Refractories, Their Effect on Alloy Steel Quality—Pouring—By E. E. Callinan, August 1936, 15.

Plant Power Characteristics—Steel—December 1936.

Plant—The Diesel Locomotive, Its Use in the Steel—By A. H. Candee, March 1936, 30.

Port, Its Design, Construction and Operation—Use of the Venturi—By Geo. L. Danforth, February 1936, 19.

Pouring of Molten Steel, Efforts Made to Produce Sound Ingots, The—By J. D. Walters and E. G. Hill, February 1936, 14.

Pouring Pit Refractories, Their Effect on Alloy Steel Quality—By E. E. Callinan, August 1936, 15.

Power Characteristics—Steel Plant—December 1936.

Power Costs Comparing Generating and Purchasing Methods—Analysis of Electric—By J. W. Bates, July 1936, 10.

Pressures—The Control and Recording of Rolling Mill—By M. Stone, June 1936, 21.

Probable Mechanism—Inhibitors and Their—By G. Walter Esau, November 1936, 33.

Problems of Fabrication—Steel Sheets for Today's Motor Car, Mechanical—By Thomas P. Archer and R. A. Geuder, December 1936, 28.

Problems of Motor Application for Continuous Mill Auxiliaries—By F. E. Harrell, April 1936, 53.

Process, Its Use in the Iron and Steel Industry—The Oxy-Acetylene—By E. J. W. Egger, March 1936, 27.

Process—The Determination of Yields in the Coking—November 1936, 27.

Produce Sound Ingots—The Pouring of Molten Steel, Efforts Made to—By J. D. Walters and E. G. Hill, February 1936, 14.

Purchasing Methods—Analysis of Electric Power Costs Comparing Generating and—By J. W. Bates, July 1936, 10.

Purposes—Sheet and Strip Steel for Deep Drawing—By Joseph Winlock, December 1936, 11.

Q

Quality—Pouring Pit Refractories, Their Effect on Alloy Steel—By E. E. Callinan, August 1936, 15.

R

Recent Developments and Improvements—Steel Mill Lighting—By Walter Sturrock, August 1936, 1.

Recent Innovations in Rolling Mills at Ford Motor Company—By M. Stone, October 1936, 15.

Recording of Rolling Mill Pressures—The Control and—By M. Stone, June 1936, 21.

Refractories, Their Effect on Alloy Steel Quality—Pouring Pit—By E. E. Callinan, August 1936, 15.

Rehabilitation and Modernization in the Iron and Steel Industry During 1935, January 1936, 28.

Report of A. I. & S. E. Committee, Steel Mill Developments—By W. H. Burr, September 1936, 36.

Resistance Welding in Steel Mills—By Walter Anderson and Malcomb Clark, November 1936, 20.

Roll Drives During 1935—Electric Motors over 300 Horsepower Applied to Main—January 1936, 36.

Roll Mill Drives—Applying Synchronous Motors to Main—By L. A. Umansky, June 1936, 1.

Rolling Mill Pressures—The Control and Recording of—By M. Stone, June 1936, 21.

Rolling Mills at Ford Motor Company—Recent Innovations in—By M. Stone, October 1936, 15.

Rolling—Tension Control in Cold Strip—By F. Mohler, October 1936, 19.

Roof Temperature Control for Use in Open Hearth Furnaces—By M. J. Bradley, February 1936, 24.

Rooms for Maintenance, Their Importance in the Steel Industry—Stock—By F. O. Schnure, May 1936, 29.

Rooms, Their Ventilation in Steel Mills—Mill Motors and Motor—By H. H. Angel, and C. H. Huston, May 1936, 13.

S

Sheet and Strip Steel for Deep Drawing Purpose—By Joseph Winlock, December 1936, 11.

Sheet and Strip Steel With the Use of Electric Furnaces—Annealing—By A. N. Otis, February 1936, 1.

Sheets for Today's Motor Car, Mechanical and Electrical Problems of Fabrication—Steel—By Thomas P. Archer and R. A. Geuder, December 1936, 28.

Sound Ingots—The Pouring of Molten Steel, Efforts Made to Produce—By J. D. Walters and G. E. Hill, February 1936, 14.

Specifications, Their Development for the Steel Industry—Lubricant—By O. L. Maag, January 1936, 13.

Statistics—1935—Electrically Operated Crane—January 1936, 38.

Steel, Efforts Made to Produce Sound Ingots—The Pouring of Molten—By J. D. Walters and E. G. Hill, February 1936, 14.

Steel for Deep Drawing Purposes—Sheet and Strip—By Joseph Winlock, December 1936, 11.

Steel Greets Oil—By Wm. A. Irvin, May 1936, 25.

Steel Hydraulically, The Application of Water at High Velocity—Descaling Hot—By J. E. Holveck, May 1936, 1.

Steel Industry During 1935—Rehabilitation and Modernization in the Iron and—January 1936, 28.

Steel Industry—Lubricant Specifications, Their Development for the—By O. L. Maag, January 1936, 13.

Steel Industry—Stock Rooms for Maintenance, Their Importance in the—By F. O. Schnure, May 1936, 29.

Steel Industry—The Engineer in the—By W. L. Batt, August 1936, 14.

Steel Industry—The Oxy-Acetylene Process, Its Use in the Iron and—By E. J. W. Egger, March 1936, 27.

Steel in Electric Furnaces—Annealing and Normalizing Auto Body—By F. T. Hague and P. H. Brace, September 1936, 47.

Steel Melting Furnaces Automatic Control in the Open Hearth—By A. J. Boynton, January 1936, 25.

Steel Mill Developments, Report of A. I. & S. E. Committee—By W. H. Burr, September 1936, 36.

Steel Mill Equipment—Lubrication of—By C. J. Klein, November 1936, 13.

Steel Mill Lighting, Developments Made During 1935—By D. H. Tuck, January 1936, 23.

Steel Mill Lighting, Recent Developments and Improvements—By Walter Sturrock, August 1936, 1.

Steel Mills—Commercial Welding as Applied to—By H. A. Woofter, November 1936, 31.

Steel Mills—Mill Motors and Motor Rooms, Their Ventilation in—By H. H. Angel, and C. B. Huston, May 1936, 13.

Steel Mills—Resistance Welding in—By Walter Anderson and Malcomb Clark, November 1936, 20.

Steel Plant Power Characteristics—December 1936.

Steel Plant, The Diesel Locomotive, Its Use in the—By A. H. Candee, March 1936, 30.

Steel Quality—Pouring Pit Refractories, Their Effect on Alloy—By E. E. Callinan, August 1936, 15.

Steel Sheets and Strip—The Cold Rolling of Mild—By Anson Hayes and R. S. Burns, December 1936, 39.

Steel Sheets for Today's Motor Car—Mechanical and Electrical Problems of Fabrication—By Thomas P. Archer and R. A. Geuder, December 1936.

Steel With the Use of Electric Furnaces—Annealing Sheet and Strip—By A. N. Otis, February 1936, 1.

Stock Rooms for Maintenance, Their Importance in the Steel Industry—By F. O. Schnure, May 1936, 29.

Stress Analysis of Locomotive and Other Large Axles—By T. V. Buckwalter and O. J. Horger, November 1936, 23.

Strip Pickle Lines—Electric Control Systems for Continuous—By J. J. Mellon, July 1936, 1.

Strip Rolling—Tension Control in Cold—By F. Mohler, October 1936, 18.

Strip Steel for Deep Drawing Purposes—Sheet and—By Joseph Winlock, December 1936, 11.

Strip Steel With the Use of Electric Furnaces—Annealing Sheet and—By A. N. Otis, February 1936, 1.

Synchronous Motors to Main Roll Mill Drives—Applying—By L. A. Umansky, June 1936, 1.

Systems for Continuous Strip Pickle Lines, Electric Control—By J. J. Mellon, July 1936, 1.

Systems—Maintenance of Lubricating Oils, Modern Methods and Treating—By R. P. Dunmire, July 1936, 29.

T

Temperature Control for Use in Open Hearth Furnaces—Roof—By M. J. Bradley, February 1936, 24.

Tension Control in Cold Strip Rolling—By F. Mohler, October 1936, 19.

Today's Motor Car, Mechanical and Electrical Problems of Fabrication—Steel Sheets for—By Thomas P. Archer and R. A. Geuder, December 1936, 28.

Ton—Open Hearth Furnace Operation—Four Million B.T.U. Per—By G. E. Rose and E. H. Schwartz, January 1936, 1.

Treating Systems—Maintenance of Lubricating Oils, Modern Methods and—By R. P. Dunmire, July 1936, 29.

U

Use in Open Hearth Furnaces—Roof Temperature Control for—By M. J. Bradley, February 1936, 24.

Use in the Iron and Steel Industry, The Oxy-Acetylene Process, Its—By E. J. W. Egger, March 1936, 27.

Use in the Steel Plant, The Diesel Locomotive, Its—By A. H. Candee, March 1936, 30.

Use of Electric Furnaces—Annealing Sheet and Strip Steel With the—By A. N. Otis, February 1936, 1.

Use of the Venturi Port, Its Design, Construction and Operation—By George L. Danforth, February 1936, 19.

V

Velocity—Descaling Hot Steel Hydraulically, The Application of Water at High—By J. E. Holveck, May 1936, 1.

Ventilation in Steel Mills—Mill Motors and Motor Rooms, Their—By H. H. Angel, and C. B. Huston, May 1936, 13.

Venturi Port, Its Design, Construction and Operation—Use of the—By Geo. L. Danforth, February 1936, 19.

W

Water at High Velocity—Descaling Hot Steel Hydraulically—The Application of—By J. E. Holveck, May 1936, 1.

Welding Apparatus, The Developments in Arc Welding—Arc—By E. Steinert and W. W. Reddie, January 1936, 9.

Welding as Applied to Steel Mills—Commercial—By H. A. Woofter, November 1936, 31.

Welding in Steel Mills—Resistance—By Walter Anderson and Malcomb Clark, November 1936, 20.

Y

Yields in the Coking Process—The Determination of—November 1936, 27.

YEAR

1935—Electric Motors over 300 Horsepower Applied to Main Roll Drives During—January 1936, 36.

1935—Electrically Operated Crane Statistics—January 1936, 38.

1935—Rehabilitation and Modernization in the Iron and Steel Industry During—January 1936, 28.

1935—Steel Mill Lighting Developments Made During—By D. H. Tuck, January 1936, 23.
